

# READY FOR THE CLOUD? LET'S FIND OUT TOGETHER.

trivadis  
Part of Accenture

**You will soon reach the end of the life cycle of certain hardware or software components or you are already using your first Cloud services? And you would like to know exactly where you stand in regard to the Cloud?**

Trivadis **Cloud Readiness Assessment** will help you! It shows you **where you are on your Cloud Journey** and how you can progress efficiently.

## YOUR BENEFITS

The Cloud Readiness Assessment gives you recommendations for action that allow you to:

- integrate Cloud solutions into your business in a structured way,
- not only keep Cloud-based costs under control, but also optimise them,
- comply with IT security and compliance requirements, and
- take advantage of the new possibilities of the Cloud for your business.

# OUR OFFER

We carry out the **Cloud Readiness Assessment** together with our Cloud experts as part of a workshop.

We analyse the areas of strategy, organisation, business and technology. This is based on documents you provided in advance, such as the IT strategy, Cloud vision, information security guidelines, IAM processes, etc.

At the end, you will receive:

a comprehensive **graphic evaluation** of the different areas,

**individual recommendations** for action for the next steps, and

an **overview** of all the questions asked and the answers given.

# OUR ASSETS

We are your strong Cloud partner because:

**1** **We are independent of Cloud providers.**  
Your requirements and benefits are our top priority.

**2** **We have specialists for all Cloud platforms – from AWS to Azure and even OCI.** We know which points need to be tweaked to gain the maximum benefit for you.

**3** **We offer you everything related to the Cloud:** from advice on solutions and platforms, operation, support and maintenance to resources and training. Like a Swiss Army knife, but even better.

**4** **We have been working as data specialists since 1994.** With the cloud, we get everything out of your data.
