

BELIMED AND TRIVADIS WIN THE DIGITAL EXCELLENCE AWARD

Zurich, 12 November 2021

On 11 November, the Digital Economy Awards 2021 were presented to six Swiss companies. The winner in the category "Digital Excellence SME" is the medical technology company Belimed, which, with the support of Trivadis, has achieved an impressive transformation from hardware to service provider.

Every year, the Digital Economy Awards recognises the digital excellence of the Swiss economy. A total of 21 companies qualified for this year's edition, six of which were now honoured on 11 November in Zurich's Hallenstadion. Among them is the medical technology company Belimed, which is one of the winners in the category "Digital Excellence" together with its strategic partner Trivadis – Part of Accenture.

In the award-winning programme "Smart Connectivity", medical washer-disinfectors from Belimed are networked with each other in such a way that their productivity data can be recorded, mapped, transmitted to third-party systems and evaluated. This enables Belimed to position itself beyond the pure production of medical devices as a digital service provider for modern hospitals. These in turn can improve existing processes in patient care and introduce new services with the intelligent use of data.

The jury of the Digital Economy Awards rightly concludes: "Belimed has made an extremely impressive transformation from hardware to service provider in a challenging, highly regulated and international environment. The company presents a convincing vision with a clear strategy including a roadmap and satisfies an effective customer need. This is reflected in a clear data strategy in which data is seen as the basis for further innovation. Co-creation with customers is a key element."

As Belimed's strategic partner, Trivadis – Part of Accenture has played a particularly important role in the transformation of the medical technology company since 2015. Trivadis not only supports Belimed in the technological implementation of its solutions, but also advises the company on business model innovation and strategy design, including go-to-market. "The Trivadis team has the ability to combine agile thinking and action with their expertise in data-driven innovation and software development. This makes it the ideal partner for Belimed's transformation," says Philippe Heim, Global Head of Digitalization at Belimed.

Ana Campos, Co-CEO at Trivadis – Part of Accenture , adds: "The Digital Excellence Award marks the fourth time that Trivadis has received an important award in just one year. This is a confirmation of our own development into the preferred partner with regard to the intelligent use of data and new technologies. We are very pleased to receive the award and thank Belimed for the longstanding, appreciative partnership."

Details on the joint project of Belimed and Trivadis – Part of Accenture:
