

BOATS THAT NEVER SINK AND HELMETS THAT TEACH YOU IN YOUR SLEEP – CHILDREN FROM HOMES PAINT THE FUTURE IN 550 DRAWINGS

Zurich, 22 December 2021

The IT services company Trivadis asked children and young people from homes in Switzerland, Germany and Austria to bring their hopes and dreams for the digital future to paper. The result is 550 drawings that provide a poignant glimpse into the world of these children.

Shortly before the turn of the year, the top technological trends predicted by leading analysts are once again highly sought after. Gartner, for example, claims that "hyperautomation" and "generative artificial intelligence" will shape the year 2022.

The IT service provider Trivadis – Part of Accenture has chosen a different approach to look into the future and has turned to the youngest experts – those who do not talk about, but in fact are the future: Children and young people. What are their most ardent wishes and hopes for the world of tomorrow? What dreams are they longing to fulfil with new technologies?

In 550 drawings, children and young people from homes in Switzerland, Germany and Austria have visualised the answers, thus providing an impressive glimpse into their world: For example, a 13-year-old boy drew a "helmet" with whose help one can "learn while sleeping at night". An 11-year-old girl wishes for an "automatic washing and petting facility for goats". In many of the drawings, houses and cars, whales, tigers and unicorns can fly – money is also a theme: sometimes it rains from the sky, sometimes it destroys the earth. Some drawings are also saddening, like the one of a 3-year-old boy who "wishes for boats" that "never sink".

"The digital future concerns us all. However, it is mainly shaped by adults. It was therefore important for us to strengthen the voice of children and young people because it is them who are – to put it bluntly – our future. We hope that the drawings will give more depth and colour to the often very shallow discourse around new technologies," says Ivana Leiseder, Head of Marketing & Communications at Trivadis – Part of Accenture.

The drawings can be viewed on the digital future board:
